D2L, the company who makes Avenue to Learn, has unveiled their new design ethos and framework for Avenue to Learn called Daylight. This new framework allows Avenue to Learn to behave in a responsive manner to whichever device (mobile phone, tablet, laptop or desktop) is viewing the page. This is a beneficial development as many of you access Avenue to Learn not only though laptops, but mobile devices as well. Some improvements include simplified navigation, wider page layout, design consistency between tools and a new My Courses widget.

There will be changes in the font, layout and overall design "feel" of courses after we upgrade to Daylight. We aim to turn Daylight on for Avenue to Learn on the morning of August 7th, 2017 and are letting you know about this well in advance of that change. In addition to our normal summer workshop offerings, we will be running a series of "What's New in Avenue" sessions which will demonstrate the new look. Those dates will be announced towards the end of May. We will also be posting more information on our support wiki at: https://wiki.mcmaster.ca/avenue

If you have any questions or concerns, feel free to e-mail Avenue support at support.avenue@cll.mcmaster.ca and we'll get the answer for you if we don't know it already.
